Content Outline

Rock Climbing

https://en.wikipedia.org/wiki/Rock_climbing

I'd like to build this site in multiple pages. I think a vertical sidebar along the left side of the page instead of a long horizontal one on the top would mimic the verticality of climbing. Through text, images/diagrams, and maps, the site can be informative for anyone who wants to learn the basics of rock climbing around the world.

HISTORY

This will go over the history of climbing.

TYPES OF CLIMBING

There are a handful of different types of climbing. Indoors, outdoors, bouldering, top rope, and lead climbing are the basics.

POPULAR LOCATIONS

Outstanding cliffs can be found all around the world from Yosemite National Park in California to Kalymnos in Greece to Thailand. This section should outline famous locations with the use of a map and text.

FAMOUS CLIMBERS

There are countless movies about famous climbers risking their lives and breaking records. This section should highlight some of the most famous men and women in the industry over the years.

SOURCES

A basic list of sources.
